

UNI-Sprays™ and VAN Nozzles

RAIN BIRD®

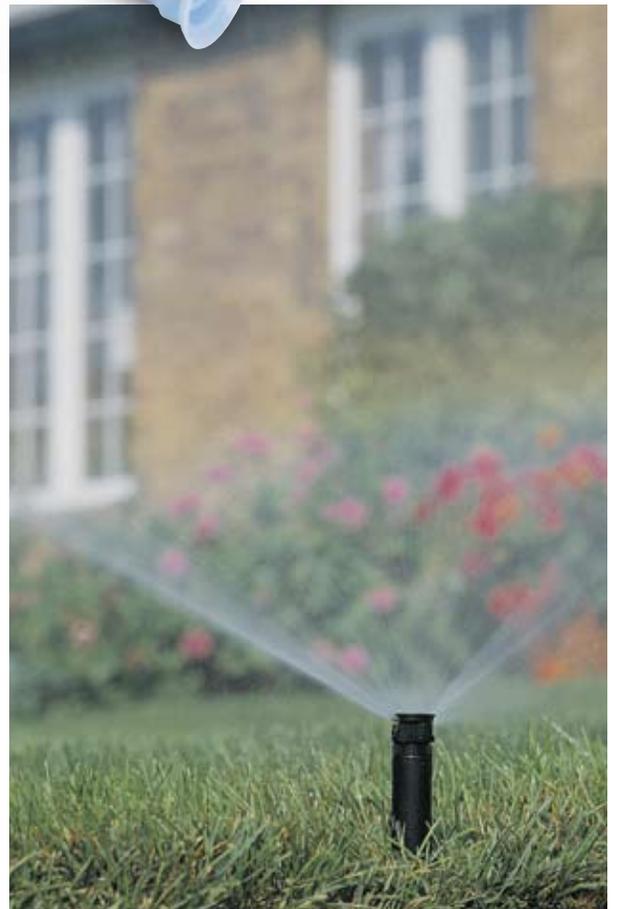

Rain Bird® UNI-Sprays and VAN Nozzles ensure the diverse needs of your landscape, including oddly shaped corners, will be evenly watered, leaving you with a beautiful lawn and garden.

Application:

Smaller grassy areas around sidewalks and driveways; can also be used for watering flowerbeds or shrubs.

Outstanding Results:

- VAN Nozzles can be adjusted to the exact pattern of your lawn, ensuring your landscape will be precisely watered, so you don't need to worry about it.
- UNI-Sprays feature a more compact design, making these sprinklers less noticeable when not in operation, so relax and enjoy your landscape.
- The wiper seal on UNI-Sprays significantly reduces the amount of water that may leak out when the sprinkler pops back down, saving water and saving you money.
- UNI-Sprays are available in 2" and 4" pop-up heights for varying grass or shrub heights.
