

LR-IP

9V Irrigation Controller

The LR-IP is a battery-powered, waterproof Bluetooth® and LoRa™ watering controller capable to program 9V solenoid valves sequentially. It is ideal for underground installations: no need to open manholes! It can be remotely controlled from anywhere when paired with a Wi-Fi or 4G gateway. When connected to a water meter, it monitors your water consumption and allows you to receive real-time alerts in the event of under or overflow leaks.

LR-IP

9V Irrigation Controller

Accurate and easy to use

Autonomous once the programming has been sent. Location automatically saved thanks to the smartphone geolocation of the smartphone during installation in the valve box.

Automatic waterbudget linked to weather forecast

Thanks to the weather forecast and the pluviometry / droughts rules, the duration times (linked to the waterbudget) will decrease automatically.
